

Smart Cart Beach Chair

Abstract of the Disclosure

A vehicle that is a two in one unique design. It is a cart (Fig. F) to transport beach items to the beach with the added convenience of converting into a comfortable chair (Fig.E) after arriving. Made of schedule 40 and 80 gauge PVC frame construction (Fig.D) it was designed for the beach resorts, for vacationers, to transport beach accessories with their families safely to the beaches and back. It tilts upward with a handle, that extends, to allow for pulling when in a standing position. Two sand tires allow movement across deep sand and rough terrain. Upon arriving cart is tilted downward which elevates tires and allows cart to sit on legs. Items are removed and when handle is retracted cart turns into a comfortable beach chair for relaxing. When leaving the handle again extends and accessories are loaded for the return trip from the beach.
